VISALYS® TEMP – HIGHLY IMPACTFUL

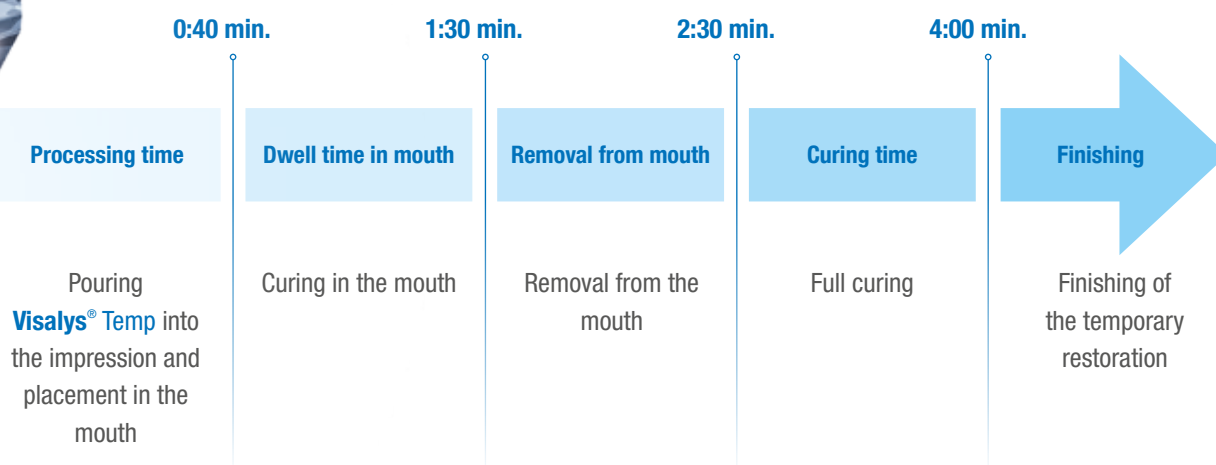

High impact strength

Measurements from the University of Erlangen, based on DIN EN ISO 179, DIN 53453

High impact strength reduces the risk that a temporary denture in the mouth will break under high or sudden chewing loads.

Working and setting times

Note:

Working times apply for products, which have been stored and processed at a temperature of 23°C/74°F and a relative humidity of 50%. Higher temperatures shorten the working time and lower temperatures extend these times.
